BAB I

INTRODUCTION

1.1 Activity Background

SAFE2024 will offer quantitative and qualitative assessments on topics including but are not limited to Lab to Blueprint: Bring Science Closer to the Community on Sustainability related to Agriculture, Food, and Energy, Food Science and Technology, Sustainable Agriculture, Sustainable Energy, Food Security, and Food Sovereignty, Putting sustainability of agriculture, food, and energy into practice, Environmental Science.

SAFE-NETWORK have a grand ambition to establish a Global University: Global Hybrid System University. This university's focus areas include Sustainable Development in Agriculture, Food, and Energy. This great desire will undoubtedly necessitate a lot of parties and institutions, particularly those from SAFE-NETWORK members, thinking about the concept of this university. The University's preparatory stage is projected to be finished in 2024. We would like to invite you to help us develop SAFE-Network University.

Advances in technology, information and science are a big wave in the continuity of modern human life today. Human creativity and innovation continue to be honed in various fields. Starting from the fields of education, health, creative economy, maritime, telecommunications, food, tourism, public policy to environmental issues. This of course has a direct impact on the running process of a country, both positive and negative.

Indonesia, as one of the world's recognized independent countries, with all its diversity and rich resources, will directly or indirectly encounter new problems as a result of this progress. The rapid flow of globalization forces humans to adapt quickly and without barriers. Society is required to answer all the challenges and potential that exist to advance the country. Therefore, the role of local wisdom is an important part in maintaining Indonesia's original diversity and richness.

Students as the next generation and agents of national change should have a competent, professional and contributive spirit. Competent in mastering the knowledge studied, professional in carrying out every function and contributive in the community environment.

1.2 Aims and Objectives of Activities

The purpose of the activities organized by the SAFE2024 International Conference on Sustainable Agriculture, Food, and Energy, is to establish international cooperation, especially between Warmadewa University and universities throughout the world. The committee will suggest many places to visit. Participants will visit the location and identify a list of problems encountered. A form of community service is a report containing problem solving and development proposals for the area visited, depending on the participant's scientific expertise.

BAB II

ACTIVITY REPORT

2.1. Activity Results

The International Conference activity "SAFE 2024 International Conference Sustainable Agriculture, Food, and Energy as potential and challenges which constitute a series of conference activities starting with abstract and paper competitions.

Product innovation is the process of generating a new product or enhancing an existing one in a creative way to fulfill community demands. Criteria for Product Innovation Competition: User desirability, Technology Feasibility, Business Viability, Environmentally friendly, Social impactfully. Based on the commulative value of all these criteria, the winners will be awarded gold medals, silver medals or bronze medals

Date : 26-30 Juni 2024
Organizer : Sustainable Agriculture, Food, and Energy
Place : Jeju, South Korea

BAB III

CLOSING

3.1. Conclusion

SAFE 2024 International Conference Sustainable Agriculture, Food, and Energy provides a forum for the international research community to exchange and share experiences, new ideas, sustainability concepts, and research results regarding sustainable agriculture, food, energy, and related disciplines. We encourage research collaboration on sustainable agriculture, food, and energy production; building regional networks between participants; raise awareness of the importance of living and working in ways that improve the economic, environmental and social well-being of our communities through research, education, regional partnerships and community engagement.

3.2. Suggestion

Some suggestions that can be given during this seminar include:

1. There needs to be a continuation of seminar activities in the future.
2. The participant management committee must be more responsive in preparing participants during the event.
3. The quality of the supporting facilities (zoom application) can be improved.
